## Company Profile

### About us

Our long love story for wood is about authentic values and original ideas, accurate knowledge and inclination on innovation, set in the magic atmosphere of *Salento*, a land full of workshops and artisans.

Established in 1992, *Alberani Parketti* represents an Italian excellence in the field of the two-layer, pre-finished wooden floorings. We hold traditional artisanship and wood culture, and match our manufacturing passion to the complete satisfaction of our customers, in order to create a unique and reliable wooden flooring.

Lepark Società Cooperativa, since September 2014, manages the *Alberani Parketti* brand.

### Mission

Through our strong sustainable identity, the selection of the finest certified raw materials, eco-friendly glues and finishes we want to guarantee households wholesomeness and the well-being of those who choose it.

With our profound spirit of innovation, full of suggestions and influences from the world of design and technological research, we aim to turn our wooden floorings into a remarkable symbol of exclusivity, creativity and naturalness.

### Brand

Collaborating with outstanding international designers and project managers, *Alberani Parketti* is continually looking forward to new ideas and innovative projects.

Our experience in the industrialized production led us to aim to perfection in every production step. Strict process controls and high quality standards characterize our products.

Our wooden floorings are innovative, but still traditional and we reinvented our posing geometries, though keeping them authentic and essential.

### **Wooden floorings**

The *Alberani Parketti Parquet*, 100% *Made in Italy*, is composed by a *noble wood's* layer and a *phenolic birch plywood* layer. The offer is very complete and various thanks to the twelve woods treated, including *Oak, Teak, Olive* and *Walnut*. The different processes (including hand planning), finishings (natural oil, wax, varnish..) and colorations make the *Alberani Parketti* collection unique and inimitable.

We are also specialized in staircases coating in each type of woods and finishings available for parquet.

### **Certificates**

Every production step is entirely held in our factory in *Nociglia*, in the province of *Lecce*. We can therefore guarantee the traceability of the materials we use, and control our high performing processes.

We use precious natural essences, with scrupulous spirit of respect for our natural heritage.

*Lepark Società Cooperativa* has the Certification of Conformity to Standard *UNI EN ISO*

*9001: 2015* of her Quality Management System for the production of *Prefinished Wood Floors*.

*Alberani Parketti* parquet has the Certification of Constancy of Performance (Standard *EN14342: 2013, CE Marking*) for *Espace* and *Cover Lak*.

Test results attest that *Fire Reaction* complies with *Bfls1 Class*, *Formaldehyde Release* complies with *E1 emission limits*, *Pentachlorophenol* concentration is inferior to *5 ppm*.
